## PRESIDENT'S WELCOME

Jenő Radetzky

A foreign economic strategy requiring and supporting a strong and permanent presence on the foreign markets has become a priority of the Hungarian economic policy. Besides 'Retaining the West – Opening up towards the East', the importance of the market opportunities offered by the countries of East-Central Europe, in particular those of the 'fifth quarter of the globe', the Carpathian Basin, has significantly increased.

Export has always been important for the industrial, service provider and agricultural enterprises of Fejér county, and their performance has exceeded the national average. Permanent presence in foreign economy is a precondition for growth and development today as well. It is an important aspect, however, that not only the companies traditionally producing for export be present in the foreign economic environment challenging their competitiveness, but the SMEs also, which play an important role in the economic structure.

Their presence serves the interest of the companies, the county and the country alike, and it is also a national interest in relation to the Carpathian Basin, and a European one at the same time. This is why the Ministry for National Economy encourages involvement in foreign economy, and provides support for the enterprises through the chambers to maintain their markets, develop their products, find new players and explore new markets. This is why the European Union attaches importance to establishing relationships between the European SMEs through building and supporting the Enterprise Europe Network, and this is why the Hungarian government programme created the Carpathian Region Business Network within the framework of the Wekerle Plan; the purpose of these organizations is to help the enterprises with valid information in cooperation with the chambers, to get their competitive products and services to areas outside their current range of operation.

The Chamber of Commerce and Industry of Fejér County has been laying great emphasis on helping enterprises to enter onto foreign markets since its establishment, and takes pride in having been present at the first steps of many businesses that have since become successful in this area. We invite you to be our partner in this process and help us in our endeavour, so that we can in turn contribute to your success! 'Get Export Ready!'

Jenő Radetzky

## CHAMBER OF COMMERCE AND INDUSTRY OF FEJÉR COUNTY

The headquarters of the Chamber of Commerce and Industry of Fejér County - the House of Economy

The Chamber of Commerce and Industry of Fejér County (CCI of Fejér County) plays a decisive role in the economy and the development of Fejér County and the Central Transdanubian Region. In Hungary chambers of commerce and industry operate on the principle of self-governance in accordance with the Act CXXI of 1999. On Chambers of Economy and other applicable legal rules. In Fejér county there are two chambers of commerce and industry with similar powers: the Chamber of Commerce and Industry of Fejér County and the Chamber of Commerce and Industry of Dunaújváros. The membership in Chambers is voluntary, however based

on the task delegated by the Act on Chambers, they keep records on all enterprises operating in the county: business organizations, social enterprises, private companies. By activities, craft business is also included here, but the farmers engaged in agri-food industry are kept on record by agricultural chambers. In synergy with international and national strategies, the Chamber considers promotion of innovation and dissemination of sustainability efforts as its strategic mission. CCI of Fejér County promotes environmental protection, supports the use of renewable energy and encourages the expansion and dissemination of knowledge about the innovation. In order to meet the above, the Chamber organises conferences, information days and operates professional clubs. The Chambers partnerships are extensive on both an international and national level, and it cooperates with the Hungarian Chamber of Commerce and Industry, the regional chambers of commerce and industry, and the Carpathian Region Business Network. In order to develop the region in a coordinated manner CCI of Fejér County closely cooperates with the sectoral ministries, with various business development organizations, and in particular with the Hungarian Investment and Trade Agency, the employment center and the public administration institutions. The Chamber cooperates with the majority of the institutions of higher education of the Central Transdanubian Region, helping to adjust the training programmes of the universities and colleges of the region to the needs of the labour market. It is a member of the International Chamber of Commerce and the Danube Chambers of Commerce Association, as well as of the world's largest enterprise development system, the Enterprise Europe Network, which is currently present in 53 countries at over 600 partner organizations. Additional information about the organization: It operates according to ISO 9001:2008, which has been verified by the valid DNV Management System Certificate being the basis thereof, and also has accreditation as an institution involved in adult education. The publication issued by CCI of Fejér County provides a comprehensive overview of entrepreneurial potential and dominant vocational sectors in Fejér county. Enterprises are introduced in the publication in alphabetical order. Please contact us to find Hungarian suppliers to meet your demands!

## THE ECONOMY AND BUSINESS ENVIRONMENT OF FEJÉR COUNTY

Hungary is located in Central Europe, in the Carpathian Basin. The country has seven regions, one of which is the Central Transdanubian region occupying 11 117 km<sup>2</sup> in the central part of Transdanubia. The region is made up of three counties located in Hungary's historic center: Fejér, Komárom-Esztergom and Veszprém counties. Important railways, roads and highways cross and navigable river segments define the area. 11 percent of the country's population live in the Central Transdanubian region, meaning more than 1.1 million people, of which 426 thousand live in Fejér county.

### PROMINENT ROLE OF FEJÉR COUNTY

Among the three counties forming the region, leading role is played by Fejér county, which produces 40 percent of regional GDP. From the viewpoint of size and population, the county is ranked in the middle of the country scoreboard, but due to its location on the line connecting western areas and on Budapest-Székesfehérvár-Balaton axis it plays economically important role. Industrial activity is decisive in the economic structure of the county.

Geographical position of Hungary in Europe - Fejér County Chamber of Commerce and Industry is flagged

The geographic location of Fejér county is favorable. Its area is one of new development zones in Central Europe, one of the innovative power centers. As a result, European development zones and trends can influence the development of the county. In this regard, two major lines of power shall be mentioned: Vienna-Bratislava-Gyor-Budapest development axis connected to the southern Bavarian Innovation Area, and Trieste-Zagreb-Nagykanizsa line connected with Mediterranean area, which also has connection to Budapest through Kiev-Trieste corridor. Budapest, as a pole of international growth, connects to these two Central European development zones through the area of the region, where due to its location and economic potential Fejér county is as well of outstanding importance.

The possibility of development of economic, geographic region is greatly influenced by the closeness to the international routes, which inter alia means the existence of adequate transport facilities. Fejér county is crossed by important railways (450 km), roads and highways (1509 km), and navigable river segments define the area. Fejér county has extraordinary aptitudes, since almost all of Helsinki corridors pass through the region and the county. Currently, road freight forwarding and transport are the most dominant in Europe, therefore the existence of motorways, the proximity of and access to these motorways are highly important. Administrative areas of Fejér County are located close to several motorways and motorway hubs, and this can be interpreted as a competitive advantage.

Proximity to the motorway junction (in minutes)

## LABOUR MARKET

In 2013, according to the Hungarian Central Statistical Office (SCO) survey on labour force in Fejér county's population, 59% of population aged 15-74 making 191 thousand people belonged to the economically active population. The average number of employees was 170.3 thousand, which is 2,200 more than in March of the previous year. The county unemployment rate was 11%, the employment rate was 52.4%. Both the unemployment rate and the employment rate are more favorable than the national average. Half of registered jobseekers are women, 12% are entrants and 16% are under 25 years of age. The number of registered entrants increased 1.3-fold from the previous year. At the end of March, all the while there were 3403 declared vacant posts in the county, which is 2.2 times higher than a year ago.

According to the data of institutional labour statistics, in Hungary, enterprises employing at least 5 people, budgetary and social security institutions and observed non-profit organizations, regardless of the number of employees, employed 2 million 600 thousand people in the first quarter of 2013 which is 1.1% lower than a year ago. The number of employees has grown just in five counties (Fejér, Győr-Moson-Sopron, Jász-Nagykun-Szolnok, Nógrád, Tolna) , in Fejér county the growth was by 0.6%, to 109 thousand people. More than three-quarters (83 thousand persons) of the number of employees in the county is employed in the private sector, their number has increased by 0.3% from a year earlier. The staff of budgetary institutions (24 thousand) increased by 2.7%.

Counting by jobs, the number of intellectual workers in the public sector has increased the most, the biggest drop was in the number of white-collar staff of enterprises. In terms of individual branches of the national economy, the two largest employers are manufacturing industry and trade, where the number of employees is 37% and 18%, respectively. In both areas the headcount growth was below 1%. Among other major economic branches, the number of employees has increased in the public administration, health care and administrative services sector and decreased in agriculture, construction and education. In terms of the proportion of employees, the manufacturing industry share of 36% is to be highlighted, while the share of trade is 18%, and the shares of education and health are each 8%. The purchasing power in Fejér county is in close interdependence with the dominant role of trade, ranked in an outstanding third place at the national level. In 2012, annual average gross earnings of full-time employees are HUF 213 000 (equivalent: EUR 736) in the county, however there is a significant spread between the earnings. While monthly gross earnings at enterprises are HUF 222 000 (i.e. EUR 767) in average, employees of budgetary organizations earn only HUF 185 000 (i.e. EUR 639) in average. Average gross earnings of white-collar resources make HUF 290 000 (EUR 1002), for blue-collar workers this figure is HUF 167 000 (i.e. EUR 577) in gross wages. (Source: CSO)

## KEY DRIVING SECTORS IN FEJÉR COUNTY

Key feature of the economic structure of Fejér county is that in terms of industrial production it is in one of the leading positions in Hungary. Multinational companies have settled in the region, the number of small and medium enterprises continues to grow, the investment environment is improving, not least because of relatively low-cost, skilled, workforce well adaptable to changes. 76% of industrial products are sold on export markets, while 24% are sold domestically. Containing presentations of some 80 businesses in the county, this publication gives an overview of the county's economy and industry specifics.

**Videoton Holding Zrt.** and **MAGYARMET Lp.** are dominant players in terms of volumes and contribution to the economic performance of the county in the area of **manufacturing of basic metals and fabricated metal products**. It is characteristic for industrial players that they continuously expand and develop their activities, the related technology and product scope. It can be said about these companies, that they carry out complex service and manufacturing activities in various sectors in addition to basic metal manufacturing, such as electronics and mechanical engineering. Companies operating in the county in the area of precision casting are suppliers of internationally acclaimed ready-for-installation components, which are used in various sectors of the manufacturing industry. One of leading companies in this area is **MAGYARMET Lp.** located in Bicske. More than 86% of manufactured parts are exported.

The Hungarian **electronics industry**, which had a long history before the regime change, is the fastest growing industry of the last period, in the international division of labour this is the most “embedded” segment, in terms of production volumes it also offers one of the highest performance from year to year. According to the data of the Hungarian Central Statistical Office, the direct contribution of the electronics manufacturing industry is one of the most important factors in domestic GDP production. Innovations in electronics area, electro-mechanical assembly and cable assembly are included among electronics industry's activities providing outstanding achievements. Representatives of the Fejér county's trade sector are **Macher Engineering and Electronics Ltd.**, **Videoton Holding Zrt.**, which companies produce industrial sensors and quality products for special vehicles manufacturers, enterprises engaged in medical technologies, defense, aerospace and printing industry players.

Almost every segment of the economy - automotive and construction, electronics industries, medicine - are increasingly relying on the results of the **plastics industry**. An important factor in the success of these areas is the development of the plastic industry and the improvement of its efficiency. County businesses operating in this sector play an important role in international markets as well, including **Karsai Plastics Holding Plc.**, **Simon Plastic Ltd.** In the majority of the Hungarian regions the **mechanical engineering** represents an economic key driving sector and the significant part of produced product is exported. Activities of mechanical engineering enterprises were significantly influenced by foreign investments, this sector concentrates an outstanding amount of foreign capital. Foreign investors gave preference to the regions with former traditions of mechanical engineering or the regions offering other market benefits. Consequently, their manufacturing potential mainly focused in the central and western parts of Hungary and so their presence is dominant in Fejér county as well. The companies are characterized by specialization. Custom parts, tools and equipment can be manufactured even in bespoke, small series. Mechanical engineering companies economically stable in the long term and pursuing continuous improvement, like **Kántor Mechanika Ltd.**, **ÉGT Ltd**, **Car-Center Ltd.** are markedly present in the county.

**Supplier's activities** are outstanding in Fejér county, it is characteristic for county enterprises that their automotive supplier activity is linking to automotive industry concentrated in the Central Transdanubian and the wider region, also their role is significant in this area in EU and third country markets. In the county, a number of multinational and Hungarian-owned companies can be found in the au-

tomotive supplier market. Among companies mentioned above, **Karsai Plastics Holding Plc.** with its eight associated companies are capable of serving leading car manufacturers and electronics industry in the domestic and international markets. Enterprises of **Macher Engineering and Electronics Ltd.** and **Videoton Holding Zrt.** with their professional experience and assurance of Western European production quality, beside the automotive industry, with their products can cost-effectively supply the defense industry, the aerospace and clean energy industry.

In **aerospace industry**, several enterprises have Aerospace and Outer Space quality certification, such as **Macher Engineering and Electronics Ltd.**, **MAGYARMET Lp.**

The use of **renewable energy sources** use, production of related products and provision of services are attributed a growing emphasis in Fejér County. Due to the spreading of renewable energy sources, many major production facilities and commercial units started to operate in recent years. **Jüllich Glas Holding**, using high-tech solutions in its products and manufacturing technologies, appears both as manufacturer and merchant Its product range includes solar collector products: flat and evacuated tube collectors. **Spring Solar Ltd.** is present with its products, while **sciQuest Ltd.** is connected with the renewable energy market through its research activity. In addition to the energy industry specialties, the companies provide energy consulting.

The base of highly skilled technical professionals with innovation potential and interacting capability is characteristic for computing, information technology and software sector. Major companies in the **computing and IT area**, that are responsive to the challenges and innovative, are **Albacomp RI Ltd.**, **Seacon Europe Ltd.**, **Unicom Informatics Ltd.** and **Cad-Cam Solutions Ltd.**

Due to favorable agricultural endowments, the food industry in Fejér county is capable of produc-

ing significant amounts of high quality products. While in the past large companies were dominating the market, nowadays the expansion of small businesses is also characteristic. The Hungarian-owned family business, **Füri Pasta Ltd.** supplies traditional Hungarian dried pasta to the international market, serving the nutritional needs of different consumer groups. Its products include several-egg pastas, so-called durum pasta varieties and reform food products. **Hungary Honey Ltd.** manufactures premium quality assorted Hungarian honey in exclusive packaging.

**Irbex Ltd.** has been exporting high quality poultry and game to international markets since decades.

**Furniture industry:** Like many other industrial sectors, the furniture industry and wood processing were as well setback by the 2008 economic crisis. Furniture industry players being present in the region are more and more focusing on high quality needs of customers and the use of innovative materials. Design activities are already aligned with the latest trends. Among furniture companies in the county, **Garzon Bútor Furniture Corporation**, **MOTE Ltd.**, **Karrier Furniture Ltd.** and **Alba Furniture Studio Ltd.** Both are prominent players in the domestic and international markets of self-produced furni-

ture products - finished furniture, fittings and components. It is characteristics for furniture industry enterprises that under influence of the economic conditions many of them seek expansion of their export markets, undertaking the implementation of complex projects, in collaboration with partner companies for construction and interior design.

**Construction industry:** Construction companies play important role in the county with their innovative products and solutions supporting environmental sustainability. Company group **Masterplast Group International** has extensive and constantly expanding international manufacturing base and subsidiaries. The operation of **Fehér Group** is significant not only at the county level, but at the countrywide level. They manufacture proprietary products and undertake complete construction execution. In the county SME sector **Eudeal Plusz Ltd.** is decisive as a general contractor, while in the area of research and development activities **Nagy & CO. Ltd.** is a key player. Both companies are open to using technologies and solutions based on renewable energy.

The role of the service sector is getting increasingly stronger in the Hungarian economy, its expansion is a consequence of economic development; outstanding amount of investments in goods forwarding and other service sectors has taken place over the last few decades. From the viewpoint of development of the Hungarian economy and, within this, of the service sector, activities carried out by multi-national companies, continually growing Hungarian SMEs and large enterprises in the area of manufacturing industry, machinery, automotive, electronics manufacturing and trading, are of outstanding importance. Fejér county economic performance stands high at the national level, mainly due to the advanced manufacturing industry, resulting in a higher income level.

**In the area of freight forwarding and logistics**, the activity of **Alba-Zöchling Ltd.** and **Truck JNB Llc.** is significant for the region.

**In the area of tourism and catering**, in recent years **Károlyi Mansion Fehérvárcsurgó**, **Möllmann House in Mór**, **Csutora Restaurant in Agard**, **Diófa Restaurant** and **Kiskakas Restaurant (Lucullus 3 Ltd.)** in Székesfehérvár are getting increasingly popular.

**In the area of adult education, training, translation, interpreting**, the Fejér county companies are prepared to co-operate, some of them have many references in the implementation and application of EU projects. The representatives of the sector are **Prisma Tanoda Ltd.**, **Bildung LP**, **Tréning Studio**, **Sasvár Llc.**, **London Style**, **M-Prospect Ltd.**

**We recommend to the attention of companies seeking cooperation, the businesses in the dominant sector of Fejér county, which are introduced in this publication in alphabetical order.**

## IN THE HEART OF EUROPE - THE ENGINE OF DOMESTIC EXPORTS

### DOMESTIC AND FOREIGN MARKET OPPORTUNITIES FOR THE BUSINESSES OF FEJÉR COUNTY

Due to strong industry, the success of privatization and increased interest of foreign capital, Fejér county's economy - with the support by the Chamber - has achieved significant growth in a short period of time. The county's economy was strong before the transition years as well.

The EU accession was of lesser significance in our county as opposed to other regions, given that so far, 80-90% of exports had been directed to the EU countries. Many industrial parks were built in Fejér county: large international companies relocating here were introducing new, high-level work culture. Based on one of the most important indicators of well-being - on the Hungarian purchasing power per capita index, the county has been holding third place in this area since the turn of the millennium.

In Fejér county, the strengthening of many companies was of such extent that in recent years they themselves have become large international corporations, Hungarian "multis". Most of them are mainly engaged in the Carpathian Basin, but some companies have also operations in the Far East and overseas. Among SMEs playing a significant role in the domestic economy, more and more companies are interested in foreign markets challenging their competitiveness.

Businesses in Fejér county are worth investing in due to high incomes, solvent demands and export-driven stable business environment; it is worthwhile to export here high added-value products, manufacturing processes and know-how.

The county economic and geographical features, the opportunity it provides due to its location at the junction of east-west roads linking large Slavic and Eastern markets with Europe north-south roads connecting the Baltic Sea region with the Mediterranean Sea region, specifically predestine it to act as a logistical "translation axis" and a domestic exports engine.

**You can also find a Hungarian partner to cooperate ! Do not hesitate to contact the officials of the Fejér County Chamber of Commerce and Industry and any businesses presented in the publication.**

Enterprise profile: Manufacturer

**Main activities with NACE code:** 31.01 Manufacture of office and shop furniture  
 31.02 Manufacture of kitchen furniture; 31.09 Manufacture of other furniture

### Introduction:

The predecessor of the company is an individual company that was launched in 1993 and over the past nearly 20 years gradually has developed into an Ltd. employing 16 people by now. Initially almost exclusively residential furniture was produced, but over the years - partly in line with market demand and partly using a "multi-pillar approach" tactics the range of services and product mix were continuously expanded. Due to the recent years technological developments and the qualified personnel the company is present and proves in several segments of the furniture industry by now. The products are mainly made of sheet materials (laminated and colour coated chipboard, veneer and MDF), but the product mix also contains furniture made of glass and metal combinations and of wood. In addition to design and manufacture of a variety of furniture the firm's CNC machining centre is ready to face challenges and produce both individual and multi-standard parts both of wood and plastic sheeting.

Introduction:

Alba Mineral Ltd. was established in 1989. The main profile is bottling of the naturally carbonated mineral water originating from Székesfehérvár region, and the products are marketed under the name of King Matthias (Mathias AQUA). Additional activity is the production of de mineralized water. Mineral water is bottled in a closed technology, on a production line that complies with the highest technical requirements. Five types of content (0.33 l, 0.5 l, 1 l, 1.5 l and 2 l) and three grades (rich, quiet and lemon) are bottled. The products are mainly sold to local and regional markets, in Székesfehérvár sub-region and the Central Transdanubian region. The crystal clear water is synergy of individual elements, which is impossible to imitate. Based on its optimum rate of calcium and magnesium, low sodium content and the almost uniquely high content of natural carbon dioxide content this mineral water is recommended for everyone, who cares about physical health and wishes to drink the best water. A special feature of the silicic acid it includes, which contains essential trace elements (silicon) the human body needs. The flavoured mineral water does not contain any added sugar or other sweeteners or preservatives. The development plans go in the direction of expansion of the portfolio of flavoured mineral waters. The company is looking for supplier of plastic packaging manufacturers (PET preform).

### Introduction:

#### PRODUCTION & EXPORT

Alpha Holding manufacture animal drugs and pharmaceuticals for the Hungarian market and for export purposes worldwide.

#### PRODUCTS FOR ANIMAL NUTRITION - NATURE'S POWER ON THE FARMS

Alpha-vet Group is an engaged researcher and user of natural humic substances developing products pioneer in environmental protection and in the restoration of natural living standards. We use raw materials of exceptional quality to manufacture final products for animal breeding, for plants, for human health and for environmental protection. We are using minerals and micronutrients in an organic humic acid complex form, so they are easily absorbed in the digestive tract of animals, this promoting the digestibility of feed and a better specific feed consumption. Humic acids as natural agents, are possible alternatives of antibiotics and chemotherapeutic preparations in many ways. Our products has a positive effect on every organism, it strengthens the immune system, and it helps the profitability of farming.

#### PRODUCTS FOR PLANT NUTRITION - DEVELOPED BY NATURE

During our development using innovative chemical solutions we achieved that the solution, in a complex form, contains all the nutrient materials in such an amount that no other products do. Using our products the risk of the pesticide residues getting into food production can be reduced. They help the power generative and protective capacity of cells and play a major role in detoxication. The „four powers” of humic acids – effective uptake, biological effect, detoxication, natural product – surpass the traditional complex formers.

### Introduction:

#### NUTRITION OF PETS

The Petfood market is a significant and growing industry in many parts of the world. Many species of animals are kept as companion animals including cats, dogs, rabbits, guinea pigs, hamsters, mice, chinchillas and recreational horses and ponies.

The nutrition of these animals needs to consider the nutrients required for health, appearance and good body condition. It is also important to balance the energy intake against the requirements of the animal for maintenance and activity.

Many companion animals can suffer from excessive weight gain and fat deposition which can be damaging to their health. Within Premium Pet Ltd. has significant expertise in the nutrition of pets, to ensure that the correct balance of nutrients is achieved and that nutritional related diseases are minimised. Our products vitamins and mineral supplements are the well designe

### Main activities with NACE code:

22.23 Manufacture of builders' ware of plastic; 22.21 Manufacture of plastic plates, sheets, tubes and profiles; 22.29 Manufacture of other plastic products; 38.32 Recovery of sorted materials

### Introduction:

The company's core activity is extrusion of PVC profiles. The product mix contains flat and angular profiles and other special profiles to cover the joints of plastic windows, containers and coverings in different sizes, cornice receiver profiles, foil tent frame tubes, flower supports, plastic fence profiles, and similar products. In own workshop fence panels and gate wings are made of the fence profiles which are sold with installation services in the district. The products are made of weather resistant and UV stabilized materials and also, various industrial PVC wastes are re-used in the manufacturing process in large quantities. In 2011 production of the previously traded injection moulded products began on own premises; such like glazing wedges to doors/windows, bore cover plugs, water drain covers, wall plugs, and in other types of packaging, furniture and electrical products. Good relations are maintained with the partners and any issues that may arise are quickly and flexibly managed. Due to the nature of the activities future partners are expected to be predictable, ordering with good timing regularly.

17.23 Manufacture of paper stationery; 17.29 Manufacture of other articles of paper and paperboard; 18.20 Reproduction of recorded media; 82.92 Packaging activities  
 18.13 Pre-press and pre-media services; 46.69 Wholesale of other machinery and equipment  
 46.18 Agents specialised in the sale of other particular products;  
 18.12 Other printing (except daily papers)

### Introduction:

BCL Ltd. was the first amongst the bar code devices distributor firms in the Hungarian market that started manufacturing of self-adhesive labels. Self-adhesive colour-printed and pre-printed labels are produced in sizes and made of either paper or speciality materials to customers' needs with flexo or digital technology. Equipment and components used by the customers for printing labels are products of the world's leading bar code printer manufacturers, like Avery Dennison Sato, Toshiba TEC and Zebra and are usually shipped immediately from stock. The ribbons used to print labels are products of the French Armor SA. which is well-known for high quality products. Ribbons are offered to almost any type of bar code printers. Due to having the production and sales in one hand the prices are competitive and affordable for the business partners. Quality, reliability, and rapid response time are the strength of the company and this is recognized by the customers. Looking for partners amongst companies operating in Hungary, that use adhesive labels in large quantities to mark their products, already have bar code printers or plant to purchase such equipment.

**Main activities with NACE code:** 25.11 Manufacture of metal structures and parts of structures

### Introduction:

The company, which was founded in 1992, deals with manufacturing and installation of security guarding rails and band shutters, both made of steel. 2-year warranty and round the clock services are offered to the products and services. In 2011 in a national tender process the company won a paint booth and a profiling machine that enable high-standard manufacture of band shutters. The product mix contains 6 different types of steel guard rails, 8 types of steel band shutters and insulated aluminium rolling shutter gates. The company's main products are shop window protection grilles, security partition grilles and Band Shutters, that are used for the protection of stores, malls, apartments, cottages or terraces. Main activities include manufacturing and assembly of security grilles and guarding rails, that can be hot-dip galvanized or powder coated or made of stainless steel. Services rendered are the following. Free consultancy, sinter or paint the frame structure of protective grilles to the RAL code colours required, 24-month full guarantee, free regular maintenance when maintenance contract is concluded, round the clock call system for servicing, repair of grilles or band shutters manufactured by another companies. Due to their machinery and large capacity delivery time is 2 or 3 days from placing the order; in case of breaking-in next-day delivery and installation of the fabricated and coated product is available. References prove the company's competence.

### Looking for partners:

Distributors, construction companies, wholesalers, retailers, end users, security companies, companies dealing with alarm system, blinds, or locksmiths and porters who are reliable, and experienced in gate technology and security technology.

Languages spoken: English, Russian

Enterprise profile: Cultivation and trading

**Main activities with NACE code:** 01.24 Growing of pome fruits and stone fruits  
 46.38 Wholesale of other food, including fish, crustaceans and molluscs

Introduction:

Cerazus Hungary Horticulture Ltd was established in 2003. Initially the company was only growing fruits on a several hundred hectares area. By now, however, trade and export of a variety of foods (alcoholic cherries, compotes and jams in large consumer packages) contribute significantly to the revenues. Export sales aim to a number of countries (incl. USA, Canada, Australia, New Zealand, Israel and Europe). Except Israel the company does not have exclusive sales agreement with any countries; thus importers and wholesalers, who may be interested in marketing their products, are welcome. Under a fruit growing research and development project new varieties of cherries are in progress that will be suitable for the manufacture of alcoholic cherry. Simultaneously, pilot production of new sour cherry varieties has also begun in order to expand the supply of alcoholic sour cherry.

**Main activities with NACE code:** 16.23 Manufacture of other builders' carpentry and joinery; 31.01 Manufacture of office and shop furniture; 31.02 Manufacture of kitchen furniture; 43.32 Joinery installation

### Introduction:

Fatrend Nyílászáró Ltd. was established in 2005 aiming to produce the highest quality wooden windows supported with high crafting expertise. The cost-effective energy management is nowadays the most important aspect to focus on when a new building is built or an old one is refurbished. Doors and windows manufactured by the enterprise are guaranteed life-long, high-quality products. The best quality of raw wood materials and the latest developments in technology are applied in the manufacturing processes. The products of Fatrend Nyílászáró Ltd. are featured by outstanding thermal insulation and noise insulation capabilities. The highest quality German raw materials are used in the manufacture of products. Concerning wooden doors and windows the surface treatment is imperative what the enterprise pays particular attention to. The Remmers Surface Treatment System is applied; the five-layer surface treatment provides extra durability to the products. The main products are wooden windows, patio doors, entrance doors, interior doors, staircases and greenhouses. Products of the portfolio are CE quality certified. The enterprise's work does not end with the manufacture or installation of windows; follow-up is also perceived important. Ten different brands of raw woods are available. While looking for major business partners active in the construction industry, distributors are also welcome.

**Main activities with NACE code:** 41.00 Construction of buildings; 22.23 Manufacture of builders' ware of plastic; 25.11 Manufacture of metal structures and parts of structures; 25.62 Machining

#### Introduction:

Since 1995, Fehér Group has been a decisive player in the Hungarian general construction industry. Major activities of the member companies include general contractor's work, manufacturing and installation of plastic and aluminum windows and doors, winter gardens and glass roof structures, distribution of special industrial exterior and interior doors (smoke-seal, soundproof, fireproof doors), construction of metal building structures, metalworking and dissemination of renewable energy on a gradually widening scale. The name of the member company acting as a general contractor is associated with construction and energy rehabilitation of residential complexes, public buildings, hotels, office buildings, shopping centers. The member companies specialized in renewable energies and associated building engineering technology are involved in the implementation of the above mentioned tasks. Due to their capability of providing a full range of general construction services and flexible customer-focused approach, they have a stable partner network and deliver products of outstanding quality. Raw materials are procured from recognized Western European suppliers such as Inoutic-Deceuninck, Schüco and Roto. The holding company has two production halls, one of which is located in Guttamási and the other of 1500m2 floorspace - in Székesfehérvár. We are looking for reliable merchandising partners, general contractors and real estate developers, for whom we can offer our production capacity.

### Introduction:

Fertilia Ltd. is a fully Hungarian owned company, which became well-known and market leader as domestic manufacturer of unique fertilizers. The company manufactures and markets solid and liquid fertilizers for farmers since 1991. The self-made fertilizer families, i.e. Gramix NPK, UMG MICRO granulated starter fertilizer, FertiSol N solutions and MASSulfix contribute over 62% to the sales revenues. For the 22 years existence Fertilia Ltd.'s business strategy has been the continuous search for innovative and advanced technology solutions and market introduction of such for satisfied customers. The company offers and manufactures high-performance, single composition fertilizers that best fit to the customer's soil, climate and crop (regardless if it is wheat, barley, corn, sunflower, canola or sugar beet). The company's main philosophy is focusing on sustainable development, thus keeping in mind the nutritional needs of plants, nutrient supply capability of the soil and therefore they recommend only the application of a volume that is absolutely necessary. Business partners are expected to be fair and reliable and this is what the company can also guarantee with their services.

**Main activities with NACE code:** 13.91 Manufacture of knitted and crocheted fabrics  
14.31 Manufacture of knitted and crocheted hosiery; 14.39 Manufacture of other knitted and crocheted apparel; 14.12 Manufacture

### Introduction:

Gigi Plus Lp and its related undertaking, Gigi Lp. manufacture protective gloves and socks. Likewise many other small and medium sized enterprises this company was also founded right after the political system change in Hungary. In the first phase 12 glove knitting machine started manufacturing. The profits earned were reinvested and thus the company has expanded over the years, manufacturing of about 7 million pairs of gloves and 180,000 pairs of socks with 160 knitting machines by now. The company is a Hungarian family business without international co-owner. Main markets are the electronics industry, lamp industry, automotive industry and suppliers of building industry. The product mix includes a range from the simple, thin cotton gloves to special gloves, made of technical fibres, like cut resistant and highly wear-resistant gloves. Major multinational companies are generally served directly; distributors and work clothing shops are also supplied, and on demand with delivery services. The company's slogan is 'Good quality and reasonable price on-time.'

Enterprise profile:

Manufacturer

**Main activities with NACE code:** 17.12 Manufacture of paper and paperboard

Introduction:

Hamburger Hungaria Kft is Hungary's largest manufacturer of corrugated base paper. As a successor of Dunapack Ltd.'s paper manufacturing business, that started in 1990, manufacturing activities were launched in the new Dunaújváros factory in 2009.

The paper mill manufactures corrugated base paper exclusively from waste paper, what will be further processed and transformed into corrugated boards and corrugated boxes by the customers. The two paper milling machines recycle approximately 700,000 tons of waste paper annually, resulting in the output of 650,000 tons of paper. The company is one of Europe's biggest factories in the industry.

Hamburger Hungaria, the largest member of the Hamburger Containerboard Group, manufactures a wide range of corrugated board paper products on its cutting-edge production lines. A speciality product is the very thin paper (i.e. 70 to 100 g/square metre)

Looking for partners:

Manufacturer of corrugated paperboard

Certificates: ISO 9001:2008; ISO 14001:2004; OHSAS ISO 18001:2007; FSC

**Main activities with NACE code:** 10.89 Manufacture of other food products n.e.c.; 46.38 Wholesale of other food; 46.90 Non-specialised wholesale trade; 82.92 Packaging activities

#### Introduction:

Hungary Honey Ltd is a small manufactory that evolved from a manufacturing enterprise. It aims to introduce and market Hungarian honey types, and manufacture other bee products, which so far were hardly available to consumers. The products have exclusive packaging and are premium quality products that would pay off in foreign demanding markets as well, thus perpetuating the Hungarian honey's reputation.

The products include honey made of aromatic and medicinal herbs, dried bee pollen in 50, 120, 250, 500, and 900 gr packs, various propolis products, comb honey, dried fruit in honey, gift sets in high standard packaging.

The enterprise is looking for merchants with market links, store chains and businesses interested in high-quality products not in high-volume, which would host its products.

Enterprise profile: Wholesaler, Manufacturer

**Main activities with NACE code:** 46.31 Wholesale of fruit and vegetables

### Introduction:

Inter-NETT 2000 Ltd (legal successor of Bt-INTER NETT 2000) has been involved into the Hungarian and international food trade for 18 years, focusing particularly on marketing of the variety canned vegetables and fruits. The company has its own brand: HUNAGRO. As a wholesaler, the company has business relationship with almost all Hungarian canning manufacturers; thus maintaining a very broad product mix, including fruit compotes (e.g. cherries, plums, etc.), pickles (e.g., cucumber, beets, kapia pepper etc.), tomato products (tomato paste, stew, etc.) and vegetables (e.g. butter-bean, green peas, corn, etc.). In addition to the canned food distribution sales of different sorts of packing is significant (like cans, bottles, TO closure, cardboard boxes, etc.). Marketing of apple juice concentrate, apple pectin concentrate and sale of high quality pectin and soft drinks started recently. Currently the company is busy with the deployment of a 1-liter award-winning non-carbonated sports refresher in international markets. INTER-NETT 2000 Ltd. has been exporting excellent Hungarian food products to more than 10 countries. The company is looking for wholesale businesses that are interested in high-quality Hungarian food distribution in foreign markets.

**Main activities with NACE code: 52.47 Wholesale of food products**

### Introduction:

Irbex Ltd. was established in 1996 for export of Hungarian food products. The product mix contains the following products:

- Frozen poultry (chicken, duck, goose, turkey);
- Frozen venison;
- Frozen rabbit meat;
- Frozen vegetables (corn, green peas);
- Pork products (bacon, salamis)

The company is present both on East European and West European markets, and seeks to expand its partnerships with different strategies in each of these markets according to local needs. One of the most important export markets is Russia, where the local, language and cultural knowledge was deepened during the 15-year history. The fact that the company is capable of meeting the specific needs of Russian customers differentiates the company from its competitors. Should you look for quality goods or services the company is ready to respond on your order.

#### Main activities with NACE code:

27.90 Manufacture of other electrical equipment

#### Introduction:

Starting from its foundation in 2001, K & G Industry, Trade and Service Company has been dealing specifically with cable assembling for the purposes of equipment and vehicle manufacturing. The experience accumulated over many years enables the fabrication of quality products. The company location is in Váli-valley, which is just 30 km from Budapest.

The company services include: cable confection, manufacturing cable harnesses, cable processing, manufacturing unique products, mounting, CNC metalworking, engraving, making gift products. The company pays special attention to the continuous training of workforce and due to this is capable of providing stable supply of high-quality products to its partners on an ongoing basis. Currently the company works for German and Austrian partners achieving their complete satisfaction. The company has all capabilities for meeting highest standards required by current and future partners in cable harness area. The company is looking for collaborative partners that can benefit from its quality products.

Enterprise profile: Manufacturer

**Main activities with NACE code:** 25.73 Manufacture of tools; 25.62 Machining; 71.12 Engineering activities; 25.11 Manufacture of metal structures and parts of structures

### Introduction:

Kantor Mechanics Ltd. started its operation as a sole enterprise in 1993, then, in 1996, it was converted to a limited liability company. Since its inception, the company has been designing and manufacturing custom parts, tools, appliances and equipment primarily for manufacturing systems of multinational corporations. Our machine park suitable for performing versatile, universal tasks has been continuously developed. With our conventional and CNC lathes and milling machines, CNC EDM machines, grinding machines, locksmith equipment and qualified staff we try to meet high quality expectations of our customers and requirements of the MSZ EN ISO 9001:2009 standard. The scope of products includes production lines, parts of equipment, hand tools for production lines, assembling machines, milling machines with manual or hydraulic vices, devices for product control, gauges, and molds for door and seat handling equipment used in the automotive industry. We also manufacture special purpose machines capable of performing special tasks, which are designed by in house engineers. Since the company is also engaged in manufacturing bespoke and small series parts, we would like to serve a business partner seeking such a supplier.

Looking for partners:

Manufacturer companies

Enterprise profile: **Designer, Manufacturer, Distributor**

**Main activities with NACE code:** 47.59 Retail sale of furniture, lighting equipment and other household articles in specialised stores

### Introduction:

Karrier Furniture Ltd. was founded in 1996 for the furnishing of offices (supplying desks, tables and chairs). Later an own manufacturing plant was set up, which started production of special-function furniture in custom sizes and colours. After a few years the product mix was extended with own-designed residential furniture. The staff includes designers and interior decorators. At present the headcount is alternating between 12 and 16, including the four representative sites in the country. The company is long-term supplier of Generali Insurance Company, Cargill, Allianz, Alcoa, DENSO, Union Insurance Company, HUNGRANA and many other well known companies. Based on interior design furnishing works of Client's rooms of banks and insurance companies is also undertaken. In the products laminate/decorative surface materials are combined with metal and glass elements. An in-house installation team is available to install the furniture produced. The company aspires to become the partner of stable businesses operating in international markets and design/manufacture furniture or complete "turn-key" interior decoration projects on the basis of the local business partner's survey. The company is looking for partners on international markets, that perform fair and professional needs assessment, and provide technically meaningful plans to the Hungarian company, which can carry out the production. In addition, tolling jobs and/or manufacturing of parts according to specifications are undertaken with state of the art CNC machines.

Enterprise profile: Manufacturer

**Main activities with NACE code:** 16.24 Manufacture of wooden containers

#### Introduction:

László Kertész, the Master, fabricates cooperage products under a sole proprietorship. The Master's philosophy is that the value of genuine Hungarian products primarily lies in the decade-long tradition, skilled work force and personally selected high quality raw materials.

The main products include various barrels, sauna vats and wooden tubs, which are bespoke products fabricated to individual customer requirements. The product range comprises decoration products for wineries, such as unique barrel bar tables, barrel stools, wine racks, carved barrel ends, barrel planters, wooden boxes, flower containers. In addition to the principal activity the services include repair and reconstruction of barrels and tubs. To fabricate vats, tubs and decoration products a new self-developed technology was introduced combined with the CNC technology. Due to the in-house development the entrepreneur is capable of responding to the market demands with more reliable, more precisely sized products, which are highly adaptable to specifics of particular applications. The outstanding quality and responding to bespoke needs maintain market leading position for the products in the premium segment of the market. Such products are already favoured in several countries in Europe, however the Master is looking for additional partners to become resellers in their countries.

**Main activities with NACE code:** 43.21 Electrical installations

### Introduction:

The company was founded by István László, technical teacher as a private entrepreneur October 15, 1983 under the name of "Lászlóvíll". Meeting high quality standards, reliability and delivering on-time contributed to the expanding of customer base. The private entrepreneurship transformed into an Ltd later when the founder gave up his full-time employment at the secondary school and decided to work only for Lászlóvíll Ltd. from July 1, 1997. The company has become more and more profitable and began to expand. The site in Seregélyesi út in Székesfehérvár appeared to be too small, thus new buildings were built in Adonyi út to accommodate the offices, a workshop, a warehouse and a separate building for the locker room, rest rooms and a kitchen. Since 2000 the company expanded with a new workshop, office and warehouse building, which is located in Börgöndpuszta, 6 kms far from the city centre. The company now provides employment for 35 people. Lászlóvíll Ltd undertake electrical installations of family homes, industrial warehouses, shopping malls, manufacturing of distribution cabinets, testing of electrical protection, lightning protection and fire protection systems, establishment of structured networks, installation of public lighting and transformers. Lászlóvíll Ltd. provides a full range of electrical services.

E-mail: **annamaria.moricz@macher.hu**

Languages spoken: **English**

Enterprise profile: **Manufacturer**

**Main activities with NACE code:** 27.32 Manufacture of other electronic and electric wires and cables

### Introduction:

MACHER Engineering and Electronics Limited Liability Company runs a 2,000 square meter production hall in Székesfehérvár, the most dynamically developing region of Hungary. Its German location coordinates the export-import business. The main profile is electronic development, cable confectioning, manufacturing of wire harnesses, and electro mechanical assembly. Continuous development and the innovative, forward-looking solutions enable cost-effective production in the following specific fields: medical technology, printing, industrial sensors, special vehicles, environmentally friendly power generation equipment, defence industry and aerospace industry.

#### Main competences:

- Twenty-two years of professional experience, continuous development and innovation, rapid response to changes in the economic environment
- International supplier relationships, integrator capabilities
- Modern machinery, automated laser processing equipment, instrumentation supported final inspection

The Macher competitiveness is based on the fact that Western European quality, efficiency and knowledge are provided at lower cost of production; and the company is located physically closer to the markets than the Far Eastern manufacturers. Since its foundation the company has striven for a distinctive capability. In this context, the activities have been developed from tolling to system supplier. The aim is to offer complete customer service, and in order to achieve this, the product portfolio has been extended with tool making, special low volume plastic injection moulding, galvanization and electromechanical assembly. The company was awarded twice with the "National Quality Award" (2000, 2009)

### Looking for partners:

Electronics manufacturers, TIER 1, TIER 2 suppliers

Certificates: AS 9100/9120, ISO 9001:2008, ISO 14001:2004

**Main activities with NACE code:** 45.31 Wholesale trade of motor vehicle parts and accessories; 4674'08 Wholesale of hardware, plumbing and heating equipment and supplies; 4690'08 Non-specialised wholesale trade

#### Introduction:

Makler Ltd. was established in 1990 and has been developing continuously since then. For 10 years the exclusive activity was wholesale of truck parts with greatest emphasis on the German IFA truck parts. In 2000 the activities were extended with the wholesale of professional workshop equipment and hand tools. The company is the exclusive importer of Genius Tools hand tools in Hungary and Romania. Every year about 30 to 40 containers of tools and components are marketed domestically, within the EU and outside EU borders. Makler Ltd. endeavours to satisfy customers' needs with its own pickup truck, own workshop and two large store rooms. Beyond hundreds of domestic partners they have a business relationship with a number of satisfied foreign customers across Europe (including Poland, Ukraine, Romania, Slovakia, Bulgaria and Austria). The product range is constantly expanding, adapting to the needs and requirements of the age. You can find at them all the tools, devices, or equipment that may be necessary to a newly launched or a well established service or workshop. Their website is dynamically built up from their database, which will be updated daily to the inventory. The company is particularly attentive to offer products of which quality complies with the European standards

**Main activities with NACE code:** 46.73 Wholesale of wood, construction materials and sanitary equipment

#### Introduction:

Founded in 1997, Masterplast Group is a leading manufacturer and marketing company of thermal insulation materials in Central and Eastern Europe region; the sales revenues in 2012 amounted to EUR 85,223 million. The Masterplast products provide complete solutions for thermal insulation, acoustic insulation, waterproofing, roofing, and also, for dry constructions. The Masterplast ISO and TUV certified products marketed through subsidiaries and partners are present in each market both of Europe and outside Europe. The company is continuously developing its production technologies; and expanding its product portfolio and range of services. Rapid development of the company was supported by the complex development and the produced and sold products that offer energy-saving and cost-effective solutions for thermal, acoustic insulation and waterproofing, roofing and dry constructions. The company meets domestic and international materials transportation challenges with its fleet of nearly 170 trucks at group level. A key to the company's success is the high logistical flexibility unusual in the construction industry and the quality of services that are customized in order to meet the partners' needs.

Enterprise profile: Manufacturer, Service provider

**Main activities with NACE code:** 25.11 Manufacture of metal structures and parts of structures; 25.12 Manufacture of doors and windows of metal

### Introduction:

January 2011, the family which had more than 13 years of professional experience at that time, founded MATPAL Ltd., with the principal activity of carrying out pipe fitter and structural steel works. Owing to their technology readiness and professional experiences the company can flexible respond to any needs of manufacturing of outstanding quality steel structures (roofs, trusses, crane rails, machine structures, frames, rotary brush washers to small and large vehicles). The offered services include locksmith works, manufacturing of stairs, railings, canopies and other metal structures made of carbon steel or stainless steel. The business has already proven its capabilities in several major projects. An example is the installation of several kilometres long high-pressure water mist extinguish systems, made of stainless steel, in many European public road tunnels. Due to flexibility and adaptability provided by the relatively small size of business the company, which is looking for new customers now, has a competitive edge to its competitors.

**Main activities with NACE code:** 45.31 Wholesale trade of motor vehicle parts and accessories

### Introduction:

Patrolline Ltd, as a member of Patrolline Group, plays a key role in the after-market of special and security equipment for cars. The Group has been operating for 19 years, its Trade Centre is located in Szekesfehervar, Hungary.

The main operations are focused on two product groups:

1. Selling high-end CAN-BUS car alarm and antitheft systems, CAN-BUS engine start systems, which are capable of heating-cooling the passenger compartment, produced by Patrolline Group, and developing a distribution network.
2. Retail and wholesale selling patrolTrack Web-based GPS fleet management and tracking systems, developing a reseller network. With our online fleet tracking system the movements of vehicles and other data can be controlled as required. Using mobile apps, vehicles can already be tracked even with smart phones. With the patrolTrack GPS system, the E-toll tax return can be automatically performed in Hungary.

Patrolline Ltd is the official supplier of qualified, high-quality products for many car importer companies. Our key customers include foreign market merchants and Hungarian car showrooms and workshops. We wish to develop our distribution network primarily in Central and Eastern Europe, Middle East, Far East and North Africa.

**Main activities with NACE code:** 32.30 Manufacture of sports goods

### Introduction:

PLASTOBO Sports Ltd. started manufacture and marketing of sports equipment in 1992. The business operates in the centre of Sárbogárd, at an area of 3,200 square metres and employs 10 people. The company's products are mainly tied to the Ball Sports, that is, manufacturing of basketball, handball, football, volleyball, tennis, and table tennis equipment.

PLASTOBO Ltd. exports the majority of its products to Germany and Switzerland delivering to 12 sporting goods retailer companies. Domestic customers are municipalities, school owners, associations, courts and park builders, playgrounds builders and private persons.

The business' philosophy is 'high quality and durable products at competitive prices.' To support this philosophy glass fibre reinforced plastics and coated aluminium and steel materials are used as raw materials to the products. The outdoor sports equipment is made of steel, with weather-resistant hot-dipped zinc coating which contributes to the longer life cycle of products. Each sports equipment is made in compliance with the relevant standard specifications.

**Main activities with NACE code:** 62.09 Other information technology and computer service activities; 33.12 Repair of machinery; 33.20 Installation of industrial machinery and equipment; 46.52 Wholesale of electronic and telecommunications equipment and parts; 74.90 Other professional, scientific and technical activities n.e.c.

### Introduction:

sciQuest Ltd. has been dealing with sales, installation and repair of uninterrupted power supplies, diesel generators and gas engines since 2007. In 2012 product development and manufacturing of the above listed items also started. Beyond distribution of the leading global brands, such as ELEN and Cover Energy for UPS; Himoina, AKSA, Teks for diesel generators an own brand, i.e. MAAG (MAgyar AGgregátor) is also offered both in the national and international markets. Since 2012 a highlighted strategic element of the business is product development. With EU funding power generation solutions, particularly gas engines are being developed in research & development projects.

Company motto: 'Authority in the emergency power supply.' Their competitive edge is the company's broad knowledge base covering the whole scale from development, to manufacturing, trade, installation and repair, thus offering a full portfolio to the clients.

E-mail: hauserjosef@simonceg.hu

Languages spoken: English, Hungarian

Enterprise profile: Manufacturer

**Main activities with NACE code:** 22.29 Manufacture of other plastic products

### Introduction:

The company was founded in 1985 as a private enterprise, which, through continuous development and improvements, has grown into a group of companies, employing nearly 400 people by now. The operations are performed on two sites, that is, in Szabadbattyán and Kőszárhegy, the first is at a 6-km distance from Székesfehérvár and the second is close to the M7 motorway. The initial metalware production soon expanded with thermoplastic production, products made of two part silicone material and with manufacturing of high quality technical plastic parts. The enterprise has become one of the most important plastic parts manufacturers in the Central Transdanubian region of Hungary, being active primarily in the market segments of automotive electrical connectors, audio systems and medical applications. A significant major company has been established which could retain the flexibility of a family business. The monthly output is about 20 million parts, including both medium and large runs. Their products are used to almost all types or cars of the world and particularly to the cars built in Europe.

Enterprise profile: Service provider

**Main activities with NACE code:** 72.19 Other research and experimental development on natural sciences and engineering

### Introduction:

Unicomp Ltd develops and manufactures wireless sensor networks and related applications. Their great experience in development and manufacturing enabled the establishment of highly flexible manufacturing processes. The firm is ready to develop small-scale solutions, including unique ones; and is experienced in the implementation of R & D projects that are funded by the EU. The Unicomp Inc's proprietary products include wireless sensor network devices (UC-Mote product family), which were developed to support higher education and research and development activities. The company's proprietary wireless data acquisition system (AgroSense) measures environmental parameters that are stored on a server, thus enabling later processing of data. Another market leader development is a sensor-net based wireless solution which is capable of continuous monitoring of the parameters of grains accumulated in flat storages (GrainPatrol).

Looking for business partners, who are primarily interested in operation of monitoring, process control, warning and intervention systems, of industrial, agricultural, and energy and utility service areas where the wireless sensor network can be a beneficial solution and/or can deliver cost savings.

### Introduction:

The 75-year old Videoton is the largest Hungarian industrial group in local private ownership that offers manufacturing and manufacturing related services to industrial companies. The Székesfehérvár-based, both financially and market-wise stable company has 9 locations in Hungary, while it also has one location in Bulgaria and one in Ukraine. On one hand Videoton is a professional, regional, integrated supplier and contract manufacturing company which is considered as the 5th largest Electronic Manufacturing Service provider in Europe and the 28th largest globally. On the other hand – based on its own traditional technologies and competences – Videoton is a multi-commodity supplier of parts, assemblies and modules in the area of electronics, plastic injection moulding, stamping, machining, precision machining, tool manufacturing and surface treatment. Besides the activities related directly to manufacturing, Videoton also provides a wide range of additional services. On one hand, our service package includes the lease of our properties in our Hungarian and Bulgarian industrial parks. While on the other hand the specialized subsidiaries of Videoton offer customized solutions in the area of HR, logistics, manpower transportation, facility management, quality management and barcode systems.

### Looking for partners:

Videoton Holding is looking for partners that seek high quality manufacturing and manufacturing related services and where the partner is interested in strategic long-term cooperation in the area of automotive industry, industrial applications, household appliances, medical equipment and other fields.

85.59 Education

### Introduction:

The company is engaged in adult education since its foundation in 1994; the training programmes include the following disciplines: languages, computer sciences and various vocational subjects, particularly in the social fields.

The quality of training is indicated by the fact that accredited programmes (English, German, Russian) are delivered in the state-approved accredited institution.

The programmes are supported by proper infrastructure both in the training rooms at the own-property down town headquarters and in the customer service offices.

Also, in relation to language training programmes translation and interpretation services are offered to the customers.

### Looking for partners:

Companies dealing with adult education, partner language schools and companies looking for services in foreign languages (like interpretation and translation)

### Main activities with NACE code:

56.10 Restaurants and mobile food service activities

### Introduction:

Csutora Restaurant is one of the most famous and oldest restaurants of the lake Velence region, which exists since the early 1930s. It is located in the centre of Agárd city, next to Road no. 7, the connection road between Budapest and Lake Balaton. High quality services, excellent cuisine and a wide selection of drinks are offered to the guests. It is also the venue of wedding parties, family and corporate events with a conference room and catering services. The excellent cuisine deservedly earned the plaque of patronage awarded by the National Association of Culinary and the Chaine House is one of the 100 best restaurants.

The restaurant is open all round the year. The heated beer garden with seats for 150 to 170 people, complete with multimedia facilities is an ideal venue for any large gathering or event. The over 50 years restaurant in Agárd is one of the landmarks of those passing by Lake Velence.

### Main activities with NACE code:

74.30 Translation and interpretation activities

### Introduction:

The company has been providing technical translations between English, German, Italian, Russian and French languages since 1992. As a reference, several Hungarian major companies and law firms can be mentioned for whom we have successfully worked during more than 20 years of our existence: RSA Cutting Systems GmbH Germany, IKR Bábolna, Hammerstein. We are proud to recall our large-scale translation projects, including the translation of Equipment Manual from English into Russian made for IKR company and translations of professional materials from German and from English made for Poultry Tech Ltd. Our professional assignments fall in a wide range, so far we have worked on topics of mechanical industry, agriculture, commerce and financial agreements. Translations are made as loan translations and the materials are prepared in Hungarian or foreign languages with graphs and charts being copied in accordance with the original document. We also undertake the translation of technical documents, contracts, business registration documents, certificates and other professional texts. Associate translators work on second job and weekends, so translations are distributed to those who are free, in accordance with the work orders. This guarantees a fast and flexible completion of work without express charges. The registered translation office is looking for orders from professional translation service partners. We produce official translations, but not certified translations. For all documents, we undertake the obligation of confidentiality.

### Looking for partners:

Translation of correspondence and technical documents between English, German, Italian, Russian, French and Hungarian languages.

**Main activities with NACE code:** 56.10 Restaurants and mobile food service activities

#### Introduction:

The family business was founded by László Madler in 1992. He managed the restaurants, Named 'Kiskakas' and 'Diófa' in Székesfehérvár with his 25 years of professional experience in and unconditional commitment to public catering. His professionalism was recognised by the Hungarian National Association of Culinary with Hungary's most prestigious honour, i.e. the Veszsz Joseph Award , and by the Fejér County Chamber of Commerce with Lifetime Achievement award. Diófa Restaurant is located directly next to Road no. 8 (E-66), halfway between Budapest and Lake Balaton along the highway; thus, it is an ideal stop point on the way either to Lake Balaton or the Capital or towards a West Transdanubia destination. The two-story restaurant building is air conditioned and accommodates up to 110 people and up to 50 people on the ground floor and first floor, respectively. A unique Mediterranean atmosphere garden offers tables for 90 people. The interior suggests warmth and a comfortable bourgeois milieu. The camera-monitored parking lot can accommodate more buses. Free use of WIFI. The Menu Card is renewed several times a year in order to offer not only Hungarian specialities but several European culinary art masterpieces to the guests. The guests can choose from 60 dishes from the German and English version of Menu Cards; beyond that at request any dishes will be prepared for groups and events.

**Main activities with NACE code:** 85.59 Adult education n.e.c.; 74.30 Translation and interpretation services

#### Introduction:

The company's philosophy is that only outstanding quality will result in a long-term cooperation, thus all of the company services are provided as their reference work. This has enabled the company established in 1996 for language training to expand its services with translation and interpreting and achieve an increasingly larger customer base. The team members' competence, experience and flexibility are the basis of their effectiveness.

Numbers and statistics are certainly important for their development; however, for the company a satisfied customer is always the first. M-Prospect corporate services include language training, skills development training sessions in English, translation, interpreting, desktop publishing, and conduction of international exams.

Prospective partners have preferably gained international experience in rendering language services; or have a product or service that will enable a mutually beneficial cooperation. Wishing for all this to be realised in the course of our cooperation.

**FEJÉR COUNTY  
BUSINESS AND RECREATION IN ONE PLACE!**

## FEJÉR COUNTY – BUSINESS AND RECREATION IN ONE PLACE!

Fejér county provides unique opportunities in terms of culture and recreation, which can be an unexploited treasure for businessmen coming here, as it is not only business or investment potentials the county has to offer.

The ecological features of the county are remarkable. Three picturesque mountain ranges (Bakony Mountains, Vértes and Velence Mountains) provide many opportunities for hiking. The county is bordered by the Danube on the east, allowing transport by water. The biggest lake of the county is the shallow Lake Velence, and not only water-sports lovers are fascinated by its marvellous fauna and flora. The county is featured by duality, as industrialized cities are mainly located in the north-western part of the county, while the majority of the county is dominated by the Mezőföld region, a transitional area between the Great Hungarian Plain and the Transdanubian Mountains suitable for agricultural activities in the first place, and this determines the structure and face of the settlements also. Owing to its multifunctionality, agriculture, besides supplying food, also fosters sustainable agriculture and through this the preservation of biodiversity. With an increasing focus on healthy lifestyle, a new group of consumers is being formed, the members of which take into consideration the economical, social and ecological pillars of sustainable development also when making their buying decisions. The potentialities of the county make it suitable for the production of the goods meeting the requirements of the new consumer groups also, supporting ecotourism.

Székesfehérvár, the county seat, is one of the most significant cities in the history of Hungary. The city was founded by Géza the Grand Duke in 972, and later his son, king Stephen I, the first king of Hungary, made it the royal coronation city and the capital of Hungary until the early Middle Ages.

The city developed remarkably during the Middle Ages, its expanding quarters were inhabited by merchants and craftsmen. The Ottoman rule ruined everything, the city was almost deserted and the former pompous buildings were despoiled. Only in the 18th century was the city able to resuscitate; its economy boomed once again, and it was also at that time that the city obtained its Baroque atmosphere. In 1703 the city regained its former title as a free royal city again, however, there was no chance for it to become the capital of the country any more. In 1777 it became an episcopal see thanks to Maria Theresa. After World War II rapid industrialization began in Székesfehérvár, and it soon became one of the major industrial centres of the country. The first one to be mentioned of the most remarkable sights of the city is the coronation church built in the early 11th century, known as the Garden of Medieval Ruins today. The Episcopal Palace with the Orb, the Episcopal Cathedral, the Town Hall, the Árpád Bath, the Hiemer House and the Bory Castle tell visitors about the history of the city. Tourist attendance of Székesfehérvár is on the increase, thanks to the Touristic Destination Management organization working in the region and coordinating the organizations, institutions, associations, and service providers interested in local tourism. Fejér county has a variegated cultural life, with cultural centres, theatres and museums offering a wide variety of programmes all year long. During the festival season excellent outdoor events await visitors.

Károlyi Castle - Fehérvársurgó

In the past years renewed castles have become the main sites of flourishing exclusive tourism. The castles of the county are located in Mór, Fehérvársurgó, Iszkaszentgyörgy, Lovasberény, Csákvár, Dég, Martonvásár, Soponya, Seregélyes, and Nádasladány. A prominent one is the building of the Károlyi Castle in Fehérvársurgó, built in 1844 in Neo-classicist style, which in its present condition is awaiting visitors with 20 guest rooms, a library, a chapel, meeting rooms and a restaurant. The rooms of the castle are suitable for organizing consultations, trainings, meetings, colloquiums for small and medium numbers of participants alike, as well as for holding major conferences. Hungary's richness in thermal waters is a special feature of its hydrography, and is unique in the world in terms of both quantity and quality. The existing stock of thermal waters can function as a take-off point around which a chain of health tourism service providers could be built. The development of thermal water based tourism has been going on for decades now, yet the results are still not satisfying. This is why large scale programmes need to be started aimed at the development of thermal tourism. Fejér county has thermal baths in Vajta and Agárd.

Bozóky Cellar - Mór

The wine-district of Mór is one of the smallest, yet one of the most famous of Hungary's 22 wine-districts. Grape and wine production has played a key role ever since historical times in the lives of the settlements located in the valley of the Vértes and Bakony mountains. The wines of the wine-district of Mór are typically white wines. Besides the dominant Ezerjő, the grape varieties Leányka, Traminer, Rizling, Zöldvelteleni and Ezerfürtű are the most common. Ezerjő is listed among the Hungaricum today. Visit

Mölmann House - Mór

the Bozóky Cellar and taste some Hungarian wines of quality! Hungarian gastronomy is a key element of Hungarian culture, featuring varied and creative foods, and unique tastes full of character.

Hungarian cuisine has a history of development of over a thousand years; the traditional provincial recipes prove the wisdom inherent in folk cuisine, as they contain a wide variety of foods made of the simplest ingredients. Hungarian cuisine is a synthesis of the ancient nomad Asian, the German, Itali-

Diófa Restaurant - Székesfehérvár

an, Slavic, Turkish, Austrian, and French gastronomy. The base materials of the traditional Hungarian dishes include different kinds of meat, fresh vegetables, fruits, new bread, dairy products, and honey.

The most famous Hungarian national dishes are the stew, the goulash, fish-soup, stuffed cabbage, chicken paprikash, potato paprikash, traditional pork dishes, bean soup, and noodles with cottage cheese. In Fejér county foreign visitors have an opportunity to taste the specialties of the famous Hungarian cuisine in a number of restaurants like Mölmann House or Diófa Restaurant. The county is mainly characterized by transit tourism today, yet the touristic concept of the county reveals great potentials for conference tourism, cultural experiential tourism, health tourism, cultural tourism, sport tourism, ecotourism, religious tourism, water tourism, wine tourism, and horse tourism.

## THE NATION'S HISTORIC CAPITAL

The General Meeting of the Municipality of Székesfehérvár, town with a county status, declared year 2013 a Festal Memorial Year with respect to the fact that the Parliament raised St. Stephen's Day to the rank of a public holiday with a law passed on 18th August 1938 in Székesfehérvár, in honour of the nine-century jubilee of the death of the state founder Hungarian King and as a recognition of the town's centuries historical and administrative centre role.

Several programs and initiation have already started as a prelude of the festal year 2013. In 1938, in honour of the 900th anniversary of the death of king St. Stephen the Parliament held its session in Székesfehérvár, and the town became richer with many institutions and public art works. In honour of the 75-year anniversary of that event the General meeting of Székesfehérvár decided to declare 2013 a festal year.

### Exhibition in Székesfehérvár with Historic Significance

As outstanding event of the St. Stephen's Memorial Year the three reliquary herms of the first Hungarian King from Zagreb (Croatia), Székesfehérvár and Kalocsa (Hungary) will be exhibited together for a period of three months in the Diocesan Museum of Székesfehérvár.

The 'Stephen the Holy King' exhibition presents the inexhaustible richness of the respect for the first Hungarian King via more than 250 precious artworks and individual installations. Another event with historic significance is the return of St. Stephen's relic to Székesfehérvár, the King's burial place after being exhibited for 800 years in the St. Stephen's Cathedral, Vienna (Austria). The exhibition will be open until 11 December 2013.
